AiVi Express Driving School Deployment Guide
Shawna Brookes
July 2019

Deployment Procedure:

1. Go to https://filezilla-project.org/ and download FileZilla:

Overview

Welcome to the homepage of FileZilla®, the free FTP solution. The *FileZilla Client* not only supports FTP, but
License.

We are also offering *FileZilla Pro*, with additional protocol support for WebDAV, Amazon S3, Backblaze B2, D

Last but not least, *FileZilla Server* is a free open source FTP and FTPS Server.

Support is available through our forums, the wiki and the bug and feature request trackers.

In addition, you will find documentation on how to compile FileZilla and nightly builds for multiple platforms in

◇ Quick download links

Download FileZilla Client
All platforms

Download FileZilla Server
Windows only

Pick the client if you want to transfer files. Get the server if you want to make files available for others

◇ News ❄

◇ **2019-07-09 - FileZilla Pro to add new features after recent customer survey**

Read the full news.

The user interface mentioned in the article will also be available for users of the free FileZilla.

◇ **2019-06-27 - FileZilla Client 3.43.0 released**

Fixed vulnerabilities:

○ Filenames containing double-quotation marks were not escaped correctly when selected for openir

Bugfixes and minor changes:

○ Added a second layer of authentication to the update mechanism

◇ **2019-06-21 - FileZilla Client 3.43.0-rc2 released**

2. Follow the installation prompts.

3. Open FIleZilla. At the top of the screen, right under "File, Edit, View…and the small icons, you will see "Host:", "Username:" and "Password:". To the right of each is a blank box. Input the following, ensuring using correct capitalization:
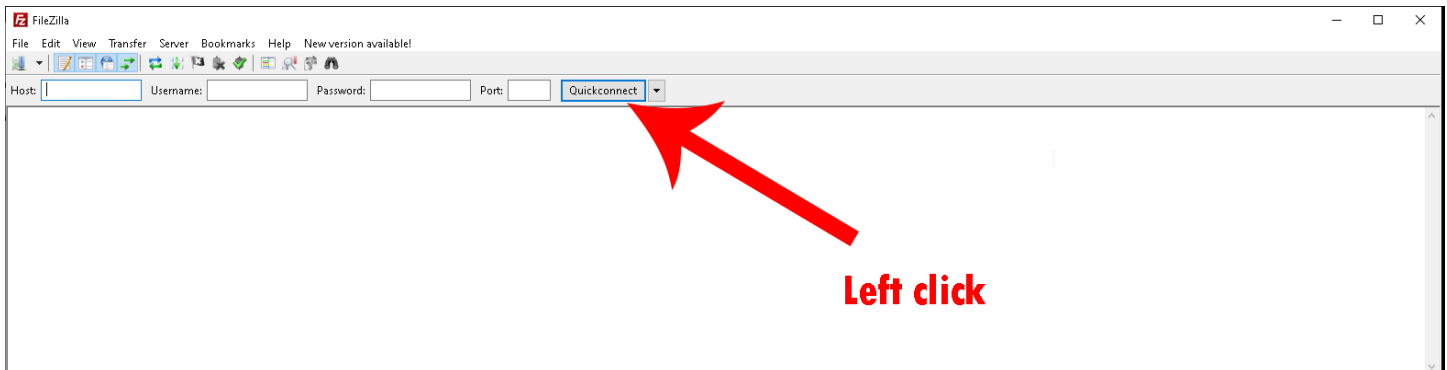

**Host: 160.153.131.190**
Username: xpxt087gmx6g
Password: FuckingHell1!

4. Then left click the "Quickconnect" button. This will now initialize server connection to your computer so you can easily move files from your computer to the server.

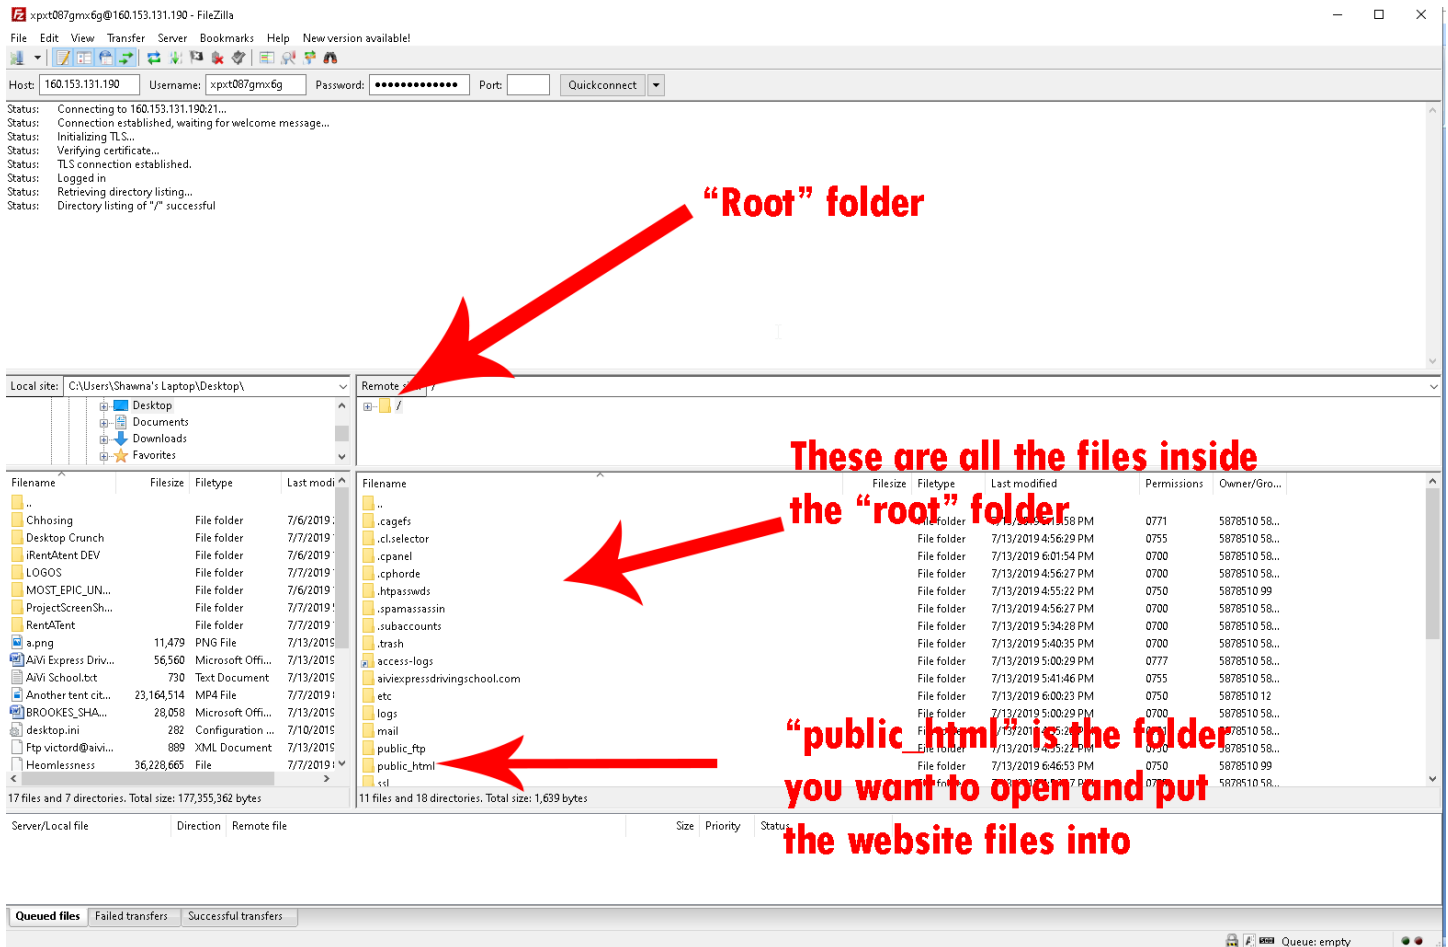

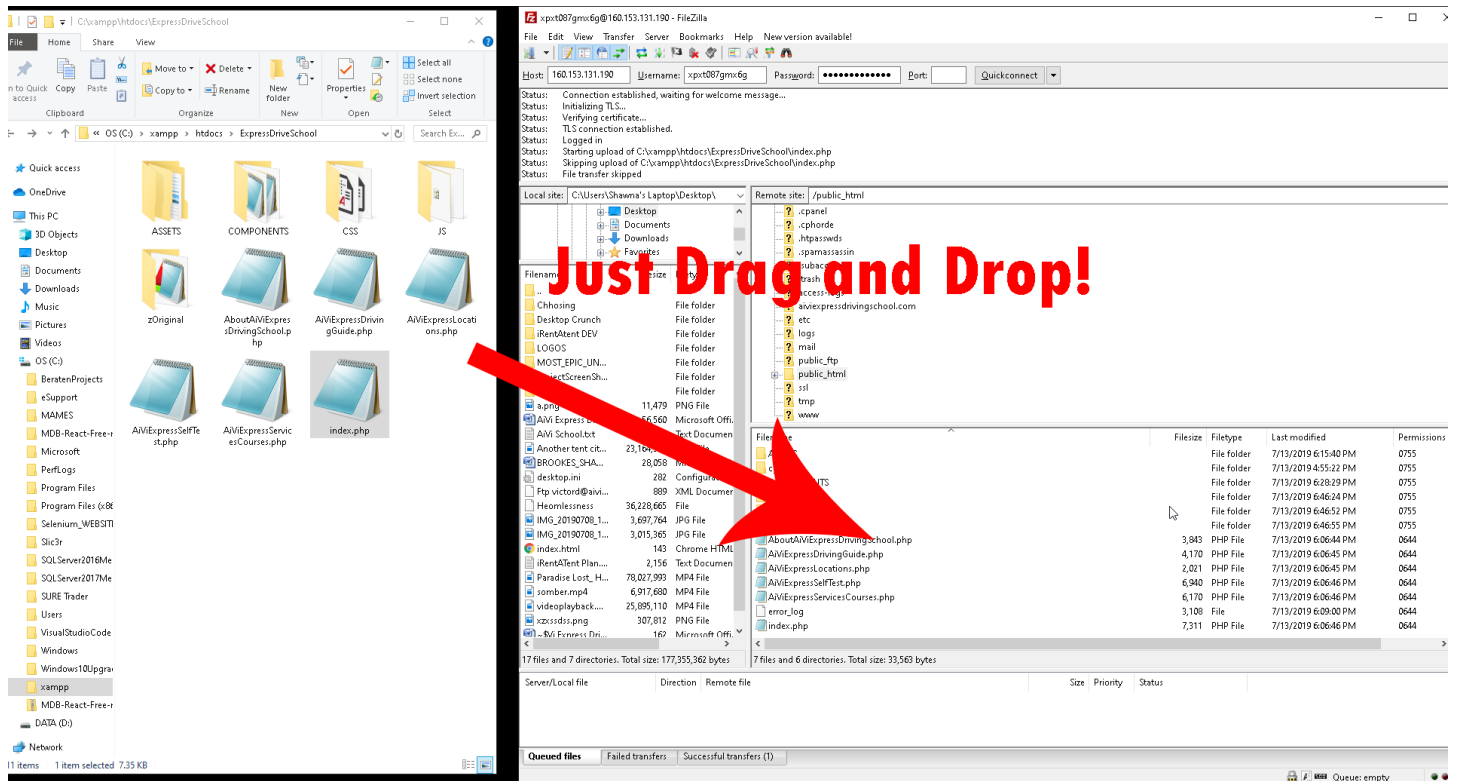

5. You might get this pop-up – if so just click "OK"

6. You will now be connected and in the "root folder." Now we need to go to the folder where you need to upload the files….
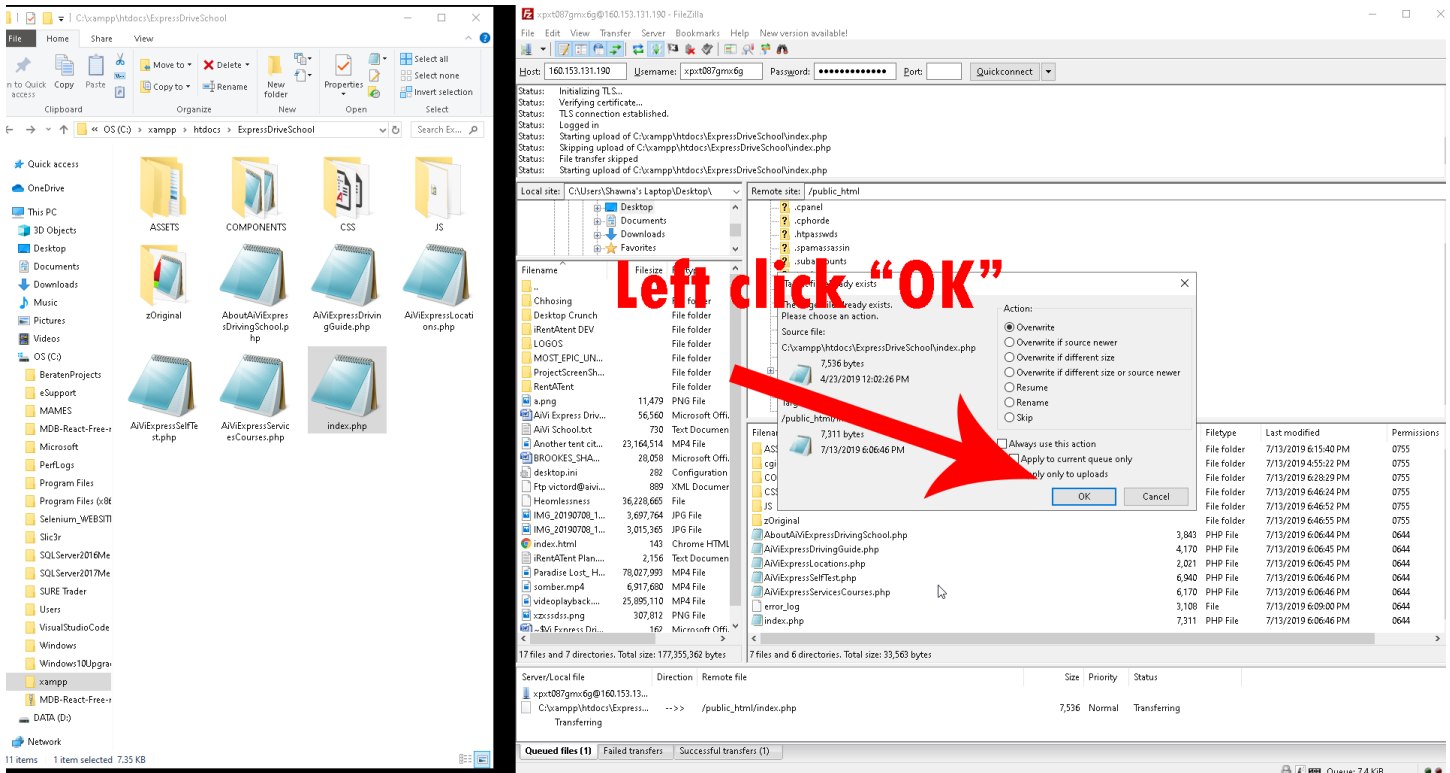

7. In the folder explorer, click on the "public_html" folder to open it. After you click on that folder, in the box below you will see all the files. You can drag and drop the files you want to upload to this folder….

Drag from your computer into the box...

Just Drag and Drop!

8. When dragging files that already exist (in the case of making website changes/ updates) you will be prompted if it is ok to overwrite. Left click "OK"

If you make a change to one file, you only have to upload that file…or if you just change 3 files, you only have to upload those 3; you don't have to upload the entire website to make it work. But be sure to remember what files you make changes! Its always good to have a backup somewhere!

9. When finished, simply close out the FileZilla program by clicking on the "X" in the upper right hand corner
